Forecast for Saturday 13 Aug 2022

Weather: The majority will enjoy a dry day with good periods of sunshine coupled with quite light winds. However occasional areas of lower cloud may sporadically spread around northern foothills from the coast, perhaps bringing some light drizzle. Also there will be a small chance of a few isolated sharp showers bubbling up during the afternoon.

Chance of cloud-free hill tops above 800m: Near 100% at this level, but note chance of cloud lower down in the far north.

Low cloud and visibility: Generally good or very good.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View
Highest risk of sunburn across south and through the afternoon.

Forecast for Sunday 14 Aug 2022
Weather: The change is upon us with showers possible throughout, these probably turning heavy at times bringing the risk of hail, thunder and potentially flooding of smaller water courses where they linger. However given the showery nature of the flow some will escape with dry and occasionally bright conditions and temperatures will remain respectable for mid-August. Further low cloud ebbing and flowing from the coasts around far northern ranges.

Maximum wind: Variable 15mph or less

Chance of cloud-free hill tops above 800m: 90% at this level, but chance of cloud lower down in the north, also bases lowering sporadically in showers.

Low cloud and visibility: Good or very good, becoming moderate or poor in showers, also very poor within cloud, in the far north at lower levels, more frequently in showers as bases lower 450-600m.

Temperature: **Glens:** Plus 9 Celsius increasing 24 Celsius for a time during the afternoon
At 800m: Plus 11 Celsius increasing 15 Celsius for a time during the afternoon
Freezing level: Well above all peaks
